

# THE ANNUAL GENERAL REPORT OF THE CONTROLLER AND AUDITOR GENERAL

ON THE AUDIT OF DEVELOPMENT PROJECTS FOR THE FINANCIAL YEAR ENDED 30 JUNE 2019

## UNITED REPUBLIC OF TANZANIA NATIONAL AUDIT OFFICE

Controller and Auditor General, National Audit Office, Audit House, 4 Ukaguzi Road, P.O. Box 950, 41104 Tambukareli, Dodoma. Tel: +255 (026) 2123759, Fax: +255 (026) 2117527, E-mail:ocag@nao.go.tz, Website: www.nao.go.tz

In reply, please quote

Ref. No. CAG.319/421/01/14

30 March 2020

His Excellency Dr. John Pombe Joseph Magufuli, President of the United Republic of Tanzania, State House, P.O. Box 1102, 1 Julius Nyerere Road, Chamwino, 40400 DODOMA.

Your Excellency,

## RE: SUBMISSION OF THE ANNUAL GENERAL REPORT ON THE AUDIT OF DEVELOPMENT PROJECTS FOR THE FINANCIAL YEAR 2018/2019

I am delighted to submit the Annual General Report of Controller and Auditor General on the audit of Development Projects for the financial year 2018/2019 pursuant to Article 143(4) of the Constitution of the United Republic of Tanzania of 1977 (as amended from time to time) and Section 34 Public Audit Act No. 11 of 2008.

I submit.

Charles E. Kichere

**CONTROLLER AND AUDITOR GENERAL** 

#### Establishment

The statutory duties and responsibilities of the Controller and Auditor General (CAG) are provided for under Article 143 of the Constitution of the United Republic of Tanzania of 1977 (as amended from time to time) and further described under the Public Audit Act No. 11 of 2008 and Public Audit Regulations of 2009.

#### Vision

To be a Highly Regarded Institution that Excels in Public Sector Auditing.

#### Mission

To Provide High Quality Audit Services that Improve Public Sector Performance, Accountability and Transparency in the Management of Public Services.

#### **Core Values**

In providing quality services, the National Audit Office of Tanzania (NAOT) is guided by the following Core Values:

- **Objectivity:** We are an impartial organization, offering services to our clients in an objective and unbiased manner;
- **Excellence:** We are professionals providing high quality audit services based on best practices;
- **Integrity:** We observe and maintain high standards of ethical behavior and the rule of law;
- People focus: We focus on stakeholders' needs by building a culture of good customer care and having competent and motivated work force;
- Innovation: We are a creative organization that constantly promotes a culture of developing and accepting new ideas from inside and outside the organization; and
- **Best resource utilization:** We are an organization that values and uses public resources entrusted to it in efficient, economic and effective manner.

#### We do this by:

- Contributing better stewardship of public funds by ensuring that our clients are accountable for the resources entrusted to them.
- Helping to improve the quality of public services by supporting innovation on the use of public services;

- Providing technical advice to our clients on operational gaps in their operating systems;
- Systematically involving our clients in the audit process and audit cycles; and providing audit staff with adequate working tools and facilities that promote independence.
- Pursuant to Section 39 of the Public Audit Act, 2008 this audit report is intended to be used by Government Authorities. However, upon receipt of the report by the Speaker and once tabled in the Parliament, the report becomes a matter of public record and its distribution may not be limited.

#### **Preface**

I am pleased to present my ninth Annual General Report on development the projects for period ended 30 June 2019. This report aims at providing our stakeholders (Members of Parliament. Central and Local

Government Officials, Media, the Development Partner Community, Non-Government Organizations, Community Based Organizations, etc.) with analysis of the findings arising from the individual audits of development projects conducted by my office for the year ended 30 June 2019. Details of the summarized matters can be read from the individual audit reports issued to respective Accounting Officers through Management Letters.

This report comprises summary of 455 individual audit reports covering 90 projects audited by my office for the financial year 2018/2019. The Government of the United Republic of Tanzania (URT) and Development Partners mainly fund these projects through bilateral and multilateral arrangements. The Development Partners include World Bank (WB), African Development Bank (AfDB), Department for International Development (DFID), KFW - Germany, International Fund for Agricultural Development (IFAD), Japan International Cooperation Agency (JICA) and European Union.

In addition, the report includes other financiers such as United Nations Development Programme (UNDP), United Nations International Children's Fund (UNICEF), and United Nations Environment Programme (UNEP), Center for Decease Control and Prevention (CDC), Global Fund

(GF), French Development Agency (AFD), Bill and Melinda Gates Foundation (BMGF), Canadian International Development Agency (CIDA), Danish International Development Agency (DANIDA), Foreign Affairs, Trade, and Development (DFATD), Japan International International Cooperation Agency (JICA), Korea Cooperation Agency (KOICA), Norwegian Agency for Development Cooperation (NORAD), OPEC fund for International Development (OFID), Swedish International Development Agency (SIDA), and United States Agency for International Development (USAID).

The report is to be submitted to the President of the United Republic of Tanzania (URT) in accordance with Article 143 (4) of the Constitution of the URT of 1977 (as amended from time to time) and Section 34(1) & (2) of the Public Audit Act, 2008. Upon the receipt of the report, the President will direct the Persons concerned to submit the report to the National Assembly.

It is my expectation that the report would assist our stakeholders to make evaluation on the appropriated funds to determine whether their utilization has achieved the intended purposes, their contribution to the economy and social development of this country is beneficial and, that there is realization of value for money.

Lastly, I hope that the Government, Parliament, Development Partners and the Public in general will find this report useful in understanding how Accounting Officers should manage development projects. For the purpose of future improvement, I will appreciate to receive the feedback and comments from users of this report within convenient time.

# Charles E. Kichere CONTROLLER AND AUDITOR GENERAL

National Audit Office of Tanzania, Dodoma, March 2020.

### Acknowledgements

I appreciate the support given to my office by the key stakeholders that enabled me to carry out constitutional obligation. The key stakeholders included the Government, Parliamentary Committees (such as Public Accounts Committee (PAC) and Local Authority Accounts Committee (LAAC), Parliamentary Budget Committees), Paymaster General, Accounting Officers in respective Ministries, Departments and Agencies (MDAs), (LGAs) Government Authorities and Authorities (PAs) who implemented the development projects.

My sincere appreciation goes to all National Audit staff for their dedication, hard work and due diligence in accomplishing this constitutional commitment. It is my hope that they will continue to provide efficient and effective audit services in order to enhance transparency and accountability in collection, utilization and safeguard of public resources.

I would like to extend my special appreciation to the Development Partners, particularly, African Development (AfDB), World Bank (WB), Department International Development (DFID), KFW - Germany, International Fund for Agricultural Development (IFAD), Japan International Cooperation Agency (JICA), European Union (EU), Center for Disease Control and Prevention (CDC). United Nations International Children (UNICEF), United Nations Development Programme (UNDP) and all other well-wishers that contributed their funds for capacity building and working towards resources modernization of audit functions.

Lastly, I would like to thank the Printer for expeditiously printing this report.

#### **EXECUTIVE SUMMARY**

Pursuant to Article 143(4) of the Constitution of the United Republic of Tanzania of 1977 (as amended from time to time) and Section 34 (1) (c) of the Public Audit Act, 2008, I hereby submit to you my ninth Annual General Report on audit of development projects for the year ended 30 June 2019.

This report aims at providing our stakeholders with analysis of the findings arising from the 455 individual audits of 90 development projects conducted by my office for the year ended 30 June 2019. The Government of the United Republic of Tanzania and Development Partners mainly funded these projects. In the financial year 2018/2019, the projects had total available funds of TZS 3.43 trillion of which TZS 2.31 trillion was spent remaining with TZS 1.12 trillion as at 30 June 2019.

Audit findings in this report have been grouped into four implementation of categories; prior year recommendations, performance, financial physical performance, and procurement management and governance.

There were 5,185 outstanding recommendations from management letters of development projects for financial year ended 30 June 2018. Out of which, 1,555 equivalent to 30 percent were fully implemented; 1,061 equivalent to 20 percent were under implementation; 1,772 equivalent to 34 percent were not implemented, 388 equivalent to eight percent were reiterated, and 409 equivalent to eight percent were overtaken by events. In the financial year 2018/2019, I issued total of 468 opinions; out of which 441 unqualified opinions, 13 qualified opinions and one adverse opinion relating to

financial statements. The remaining 13 opinions relates to internal controls and compliance.

The key findings noted from the audit of development projects in the year under audit are as follows:

## Pending Works and Open Contracts Related to REA Projects Are Yet to be Concluded for Period Up to 10 Years

REA targets to achieve electrification of all 12,268 villages in mainland Tanzania through implementations of turnkey projects launched more than 10 years ago<sup>1</sup>. During the financial year 2018/2019, I noted that 60 turnkey projects (14 for turnkey phase I and 46 for phase II) and 105 other rural electrification projects are yet to be concluded due to unresolved prevailing snags and other pending contractual obligations such as none issuance of completion certificates.

My site visit conducted in January 2020 observed that contractors to these projects left the sites some years back without reaching any consensus with REA and TANESCO on the pending snags, which has inhibited some of the households to be electrified.

Further, there is a risk of some of electrified villages to have inadequate number of connected households under turnkey phase I and II, which could possibly be a lesson learnt for the ongoing turnkey phase III round one projects.

While acknowledging the efforts made by REA, it is my view that REA has to solve the pending snags as well as seek the conclusion on the pending contractual

<sup>&</sup>lt;sup>1</sup> Turnkey phase I, II, and III were covered in years 2010/2012, 2013/2015, and 2018/2020 respectively.

obligations by devising a comprehensive plan for the issues noted. Therefore, the stakeholders need to prioritize the follow up with the contractors or come up with a strategy for quick correction and conclusion for the long pending snags and contract obligations respectively.

## Unpaid Contractors Claims TZS 1.03 trillion (Inclusive of Penalties TZS 224.03 billion and Compensation TZS 13.02 billion)

My review of construction projects relating to roads and airports at Tanzania National Roads Agency (TANROADS) revealed significant overdue claims from contractors and consultants amounting to TZS 1,031,136,423,627.27 as at November 2019 due to late payment of Interim Payment Certificates (IPCs). The total outstanding claim was made of principal amount TZS 794,091,175,546.39, interest charges of TZS 224,025,668,186.62 (current year TZS 166,930,716,964 plus prior year TZS 57,094,951,223), and compensations amounting to TZS 13,019,579,894.23 from project affected people.

It was revealed that the outstanding claims were caused by under release of funds by the Ministry of Finance and Planning; that eventually inhibited TANROADS to pay the contractors on time and consequently resulted to slow progress of works as well as escalation of project cost due to interest charges.

In addition, I am concerned that the untimely payment of outstanding claims of the contractors and consultants may increase the amount of debt due to interest charges which may make the pertinent projects stall or remain uncompleted therefore, denying citizens the intended benefits of the projects.

## Long Outstanding Unspent Project Balances in Holdings Accounts USD 25.16 million

My review of holdings accounts at Treasury showed unspent balance amounting to USD 25,161,526.18 from 12 projects. Most of these projects were closed some years back and the balances had been outstanding for a period up to seven years without being utilized.

It is my view that the unutilization of monies for long period exposes the funds to the risk of being used for unintended activities.

## Delays to Take Action on 384 Extractive Companies for Non-compliance with the Tanzania Extractive Industries (Transparency and Accountability) Act

My review observed that 384 extractive companies were yet to submit to the Tanzania Extractive Industries Committee<sup>2</sup> annual reports containing information on local content and corporate social responsibility as well as capital expenditures at every stage of investment. This is contrary to Section 15(1)(2)(3) of the Tanzania Extractive Industries (Transparency and Accountability) Act 2015

In addition, as at the time of the conclusion of my audit on March 2020, TEITI was yet to take appropriate measures on the defaulting 384 companies as provided under Section 23(b) of Tanzania Extractive Industries (Transparency and Accountability) Act, 2015.

<sup>&</sup>lt;sup>2</sup> The Committee is under Tanzania Extractive Industries Transparency Initiative (TEITI) a project which is implemented <u>under Ministry of Minerals</u>

While I am acknowledging the efforts made by TEITI management to enforce 16 out of 400 extractive companies to comply with the Act, I urge TEITI to ensure that the remaining 384 companies do comply with the requirements of transparency and accountability in extractive industry.

#### **CHAPTER ONE**

#### INTRODUCTION AND BACKGROUND OF PROJECTS

#### 1.1 Introduction

Five Years Development Plan Phase II (FYDP II) outlines new interventions to enable Tanzania industrialize in a way that will transform its economy and its society. There are four groups of interventions adopted in FYDP II; industrialization; growth and fostering social transformation; development and improving environment for enterprise development; and getting implementation right. In line with these interventions, the Government continues to establish development sectoral projects regularly. Therefore, this chapter presents background details of the audited development projects (arranged sectorwise), responsibilities of CAG and the Accounting Officers, purpose and scope of the general report, methodologies used in conducting individual audits as well as the structure of this report.

## 1.2 Background of Projects Audited

My office has audited 90 projects implemented in the financial year 2018/2019 with their summary of findings being incorporated in this report. I have grouped these projects into seven sectors namely; Agriculture, Education, Energy and Mining, Health, Transport, Water and Social Sector.

## **Agriculture Sector**

The Government continues to focus on transforming the Agriculture Sector into advanced productivity, commercialized, profitable and surplus producing in order to cater for the domestic and international market. In this regard, implementation of various agriculture

projects has been underway over the years in order to achieve the planned objectives in the sector. In this financial year, I have audited six projects relating to the Agriculture Sector as shown in **Table 3.1**.

#### **Education Sector**

The Education Sector Development Plan for 2016/2017 - 2020/2021 intends to guide reform initiatives designed to bring about changes in Education Sector. In a nutshell, it aims to ensure the development of basic and tertiary education, put emphasis on the expansion of technical vocational education and training, and prepare skilled work force as a critical part of the country's human resources development strategy. During the financial year 2018/2019, I have audited 10 projects relating to the education sector as shown in **Table 3.2**.

### **Energy and Mining Sector**

In line with National Energy Policy 2015 (NEP 2015), the Energy and Mining Sector has continued to implement the urban and rural programs as well as projects that focus on rural electrification, promotion and development of renewable and non-renewable energy sources. Under the FYDP II, the mining sector seeks to promote resourcesbased industrialization in order to add value in the endowed industrial minerals, precious metals, gemstones. In order to achieve this, several projects were implemented in the mining sector such as construction of regional mining offices and capacity building under Sustainable Management of Mineral and Resources Project (SMMRP), intervention transparency and accountability under TEITI. During the year under review (2018/2019), I have audited 20 projects; 17 relates to energy sector and three to mining sector as shown in Table 3.3.

#### **Health Sector**

In line with the National Social-Economic Policies, Government's Strategic Plans and Programs, strategies in the health sector focus on the following matters; public private partnership in the provision of service delivery, use of information and communication technology (ICT) in strengthening health services provision as well as sensitization of citizens' enrollment to health insurance.

Briefly, activities implemented under this sector aim at improving the provision of health services in the country. During the year under review, I audited 12 projects as shown in **Table 3.4**.

### **Transport Sector**

Under transport sector, the Government has committed to improve the transportation infrastructure in line with the National Transport Policy 2011-2025. In view of that, the Government continues improving the country's airports, roads, railways and ports so that there is smooth conduction of economic and social activities, both internally and externally.

During the year under review (2018/2019), I audited ten projects relating to this sector as shown in **Table 3.5**.

#### **Water Sector**

The Ministry of Water and Irrigation (MoWI) is implementing sector reforms aiming at improving the integrated water resources management and improving water supply and sanitation services in rural and urban areas. In order to attain the objectives of National Development Vision by 2025, the Water Sector Development Program (WSDP) was established through the guidance of National Water Policy 2002. WSDP has been the major project in the Water Sector with some

other projects that supplement the main objective of improving water supply and sanitation in rural and urban areas.

During the year under review, I audited seven projects relating to Water Sector as shown in **Table 3.6.** 

### Social Sector and Other Projects

Main project covered in this category is the Tanzania Social Action Fund Project Phase III (TASAF III) / Productive Social Safety Net (PSSN) under the social sector and other projects crosscutting issues such as environmental protection, human settlement, capacity building in various strategic areas including legal, governance and management of natural resources. TASAF III is part of the National Poverty Eradication Strategy established to empower communities to access opportunities that contribute to improved livelihood as linked to the Millennium Development Goals (MDG) as stated in the Tanzania Poverty Reduction Strategy (TPRS). Its objective is to create a comprehensive, efficient, and well-targeted productive social safety net for the poor and vulnerable section within United Republic of Tanzania. Implementation of TASAF III is through LGAs where the beneficiaries are located.

Other Projects cover programs with activities cutting across various sectors such as environmental, tourism, fisheries, legal, capacity building, and poverty eradication. Funding of these projects comes from a range of financiers such as World Bank, AfDB, UNDP, UNICEF and other Development Partners.

During the year under review, I audited one project under Social Sector (TASAF III) and 24 other projects as shown in **Tables 3.7.** 

### 1.3 Responsibilities of Accounting Officers

Section 25(2) of the Public Finance Act, 2001 (revised 2004) requires Accounting Officers<sup>3</sup> to prepare the annual financial statements which give a true and fair view on the performance of the projects, receipts and payments made under the project as at the end of the financial year.

Similarly, Order 11, 14 and 31(1) of the Local Government Financial Memorandum of 2009 and the Memorandum of Understanding (MoU) between Project Implementers and Development Partners require managements to ensure proper keeping of accounting records and the maintenance of a sound system of internal controls within the entity.

### 1.4 Responsibilities of the Controller and Auditor General

I am required by Section 10 of the Public Audit Act, 2008 to satisfy myself that all accounts have been kept in accordance with Generally Accepted Accounting Principles as required by relevant laws and that all reasonable precautions have been taken on safeguarding the collection of revenue; and that all expenditure of public monies have been properly authorized and applied to the purposes for which they were appropriated and that the laws, directions and instructions applicable thereto have been duly observed; and economy, efficiency and effectiveness have been achieved on the use of public resources.

I am also required by Section 48(3) of the Public Procurement Act, 2011 to state in my Annual Audit Report whether the Project Implementers have complied with the Procurement laws and its Regulations. This report provides highlights on the issues noted from

<sup>&</sup>lt;sup>3</sup> Accounting Officers of the LGAs, MDAs, Public Authorities and Other Bodies who implement projects

individual audits conducted on development projects. It aims at assisting Stakeholders including Members of Parliament, the Government, Mass Media, the Public and others to take informed decisions in order to improve the performance of development projects in the country.

## 1.5 Scope and Applicable Audit Standards

## 1.5.1 Scope of the Report

This report mainly covers projects that are financed by Government in collaboration with Development Partners. It summarizes the audit of 455<sup>4</sup> individual management letters and audit reports conducted on 90 projects that were implemented by 422<sup>5</sup> entities in financial year 2018/2019 as shown in **Table 1.1**. The table analyzes audited projects sectorwise. Development projects which are not in this report had been covered in my general reports of Public Authority, Central, and Local Gevernment.

Table 1.1: Number of Projects audited per Sector for the financial year 2018/19

| SN   | Sector            | No. of<br>Projects<br>Audited | Number of<br>Project<br>Implementers | Number of<br>Audit<br>Reports |

Scope of individual audits covered the evaluation of financial accounting system, internal controls over

6

<sup>&</sup>lt;sup>4</sup> Number of audits conducted depends with number of projects implemented by that entity.

<sup>&</sup>lt;sup>5</sup> One entity can implement more than one project.

various activities of respective project audited, compliance with Rules and Regulations including procurement and other requirements that govern the operations of specific projects. These audits were conducted on a sample basis; therefore, the findings were confined to the extent that records, documents and information requested for the purpose of the audit were made available to me.

The main objective of conducting these audits is to enable CAG to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether due to fraud or error and are prepared in accordance with an applicable financial reporting framework; operations carried out efficiently and whether laws and regulations have been complied with.

## 1.5.2 Applicable Audit Standards

NAOT is a member of the International Organization of Supreme Audit Institutions (INTOSAI) and the African Organization of Supreme Audit Institutions of English-Speaking Countries (AFROSAI-E). Therefore, the applied audit procedures were in line with the International Standards of Supreme Audit Institutions (ISSAI) issued by INTOSAI and International Standards on Auditing (ISA) issued by the International Federation of Accountants (IFAC).

I am required by these standards to comply with ethical requirements of planning and performing of the audit in order to obtain reasonable assurance on whether the financial statements are free from material misstatements and are prepared according to the Memorandum of Understandings (MoU).

## 1.6 Audit Methodology

My audit approach included tests of the accounting records and other procedures in order to satisfy the audit objectives. My audit procedures included the following:

- Planning the audit to identify and assess risks of material misstatement, whether due to fraud or error, based on an understanding of the entity and its environment, including the entity's internal controls;
- Obtaining sufficient appropriate audit evidence about whether material misstatements exist, through designing and implementing appropriate responses to the assessed risks;
- Carrying out physical verification of projects activities and assess performance of implementation;
- Assess the compliance of laws and regulations as well as the specific requirement of projects;
- Forming an opinion on the financial statements based on conclusions drawn from the audit evidence obtained; and
- Following up on the implementation of the previous year's audit findings and recommendations and ensure that proper action has been taken in respect of all matters raised.

## 1.7 Structure of Audit report

This general report is structured into seven chapters as follows:

Chapter one provides background of development projects audited during the year in each sector, responsibilities of Accounting Officers and CAG, scope, methodologies as well as standards used in carrying out individual audits; chapter two focuses on implementation status of prior year audit recommendations; chapter three covers issues related to financial performance including project financing details, audit opinion issued

and findings noted on financial management; chapter four relates to findings from physical performance of the projects, chapter five covers findings related to procurement management and governance of projects, chapter six covers conclusion based on audit findings; and chapter seven covers recommendations based on issues noted in the preceding chapters.

#### **CHAPTER TWO**

## IMPLEMENTATION STATUS OF PRIOR YEARS AUDIT RECOMMENDATIONS

#### 2.1 Introduction

There were 5,185 outstanding recommendations from management letters of development projects for financial year ended 30 June 2018. This chapter presents implementation status of the outstanding recommendations. My recommendations intend to assist Project Implementers to rectify anomalies noted during the audit and suggest respective solution for future improvement.

## 2.2 Implementation of Prior Years Recommendations

As shown in **Table 2.1**, my analysis shows that out of the outstanding recommendations, 1,555 equivalents to 30 percent were implemented; 1,061 equivalent to 20 percent were under implementation; 1,772 equivalent to 34 percent were not implemented, 388 equivalent to eight percent were reiterated, and 409 equivalent to eight percent were overtaken by events. Detailed implementation status is provided in the individual management letter of respective auditees (Projct Implementers)

Table 2.1: Implementation Status of Prior Year Recommendations

| Other Projects | 131                    | 65              | 44                          | 19                     | 2              | 1                          |
| Total          | 5,185                  | 1,555           | 1,061                       | 1,772                  | 388            | 409                        |
| Percentage     | 100                    | 30              | 20                          | 34                     | 8              | 8                          |

Source: Follow up on prior year CAG management letters 2017/2018

Looking at **Table 2.1**, I am of the view that the implementation status is still unsatisfactory, as only 30 percent of the outstanding recommendations were fully implemented.

In addition, my four consecutive years' analysis on the implementation of my recommendations with regard to development projects shows that the rate of implementation is unsatisfactory (below 50 percent) as shown in **figure 2.1.** Therefore, I urge the Accounting Officers to ensure that the rate of implementation is improved so that there is efficiency and effectiveness in the execution of the development projects.

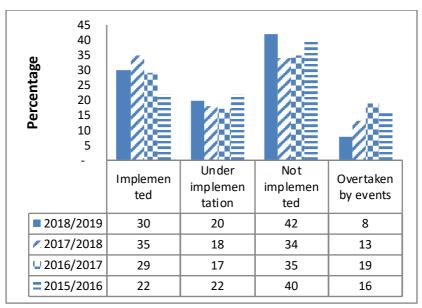

Figure 2.1: Trend on Implementation of Audit Recommendations

#### **CHAPTER THREE**

#### FINANCIAL PERFORMANCE

#### 3.1 Introduction

In financial year 2018/2019 the audited projects had total of TZS 3.43 trillion available, out of which TZS 2.31 trillion was spent remaining with TZS 1.12 trillion. Therefore, this chapter presents financing details of the audited development projects for the financial year 2018/2019. It also provides summaries of funds disbursed and utilized by the implementers. The presentation is arranged sector-wise. Notwithstanding, the chapter provides details of the audit opinions issued as well as analysis of audit findings relating to financial management.

## 3.2 Projects Financing

The following are details of funds disbursed and utilized for development projects in seven sectors namely; agriculture, education, energy and mining, health, transport, water and social sector, which includes TASAF and other projects.

## 3.2.1 Agriculture Sector

During the financial year under review, I audited six projects implemented under the Agriculture Sector with TZS 52.2 billion being available for use TZS 42.73 billion was spent remaining with TZS 9.47 billion for implementation of the outstanding activities (Table 3.1)

Table 3.1: Summary of Funds Available and Utilized (amount in TZS/ million) - Agriculture Sector

| S/N   | Name of Project   | Funds<br>available<br>(TZS) | Funds<br>utilized<br>(TZS) | Closing<br>balance<br>(TZS) |
|-------|---|-----------------------------|----------------------------|-----------------------------|
| 1     | African Center for Excellent for Innovative Rodent Pest Management and Biosendor Technology Development (IRPM & BTD-Rat Tech) | 3,215.43                    | 1,515.58                   | 1,699.85                    |

#### 3.2.2 Education Sector

In the education sector, I covered ten projects under the Ministry of Education, Science and Technology (MoEST). During the financial year under review, TZS 402.64 billion was available for use of which TZS 273.65 billion was spent remaining with TZS 128.99 billion for implementing the outstanding activities (Table 3.2).

Table 3.2: Summary of Funds Available and Utilized (amount in TZS/ million) - Education Sector

Source: Management Letters of financial year ended 30 June 2019

### 3.2.3 Energy and Mining Sector

During the financial year 2018/2019, the 20 audited projects in this sector had available funds amounting to TZS 688.13 billion of which TZS 480.55 billion was spent remaining with TZS 207.57 billion equivalent to 30 percent that will be used for implementation of the outstanding activities (Table 3.3). The Government of Tanzania jointly funded some projects in the energy and mining sector with Development Partners. Other financiers include World Bank, AfDB, UNDP, Foreign Affairs, Trade, and Development (DFATD) also formerly known as Canadian International Development Agency CIDA, and the European Union (EU).

#### 3.2.4 Health Sector

The health sector has three main projects namely; Health Basket Fund (HBF) which is financed by DANIDA, World Bank, Canada, Ireland, Korea International Cooperation Agency (KOICA), Switzerland and UNICEF; Strengthening Primary Health Care (SPHC) project is financed by the World Bank and the Global Fund Project financed by the Global Fund.

The HBF<sup>6</sup> focuses on strengthening the health system in Tanzania Mainland by providing additional funding to Ministries and Local Government Authorities (LGAs). The Strengthening Primary Health Care (SPHC) targets to improve the quality of primary health care (PHC) with a focus on Maternal, Neonatal, and Child Health (MNCH) services in Tanzania. The Global Fund<sup>7</sup> supports the Government in capacity building through increased human resources for health, improvement of access to quality health commodities and enhancement of health information for informed decisions specifically for Tuberculosis (TB), Human Immunodeficiency Virus (HIV), and Malaria.

During the financial year 2018/2019, TZS 656.15 billion was available and TZS 482.48 billion was spent while TZS

<sup>&</sup>lt;sup>6</sup> HBF presented in this report was implemented by MoHCDGEC, PO-RALG and LGAs.

<sup>&</sup>lt;sup>7</sup> Global Fund is implemented through funding of three components (i) Tuberculosis (TB) (ii) HIV (iii) Malaria Resilient Health System Strengthening (RHSS Malaria) for supporting Malaria.

173.66 billion remained for implementation of the outstanding activities as shown in **Table 3.4.**

## 3.2.5 Transport Sector

The financing of ten ongoing Development Projects in this sector are implemented by TANROADS, PO-RALG, Tanzania Rural and Urban Roads Agency (TARURA), LGAs, Tanzania Ports Authority (TPA), and Tanzania Railways Corporation (TRC) through funds received from Development Partners namely; AfDB, World Bank, European Union, Kuwait Fund and JICA.

For the financial year ended 2018/2019, a total of TZS 864.32 billion was available for use and TZS 512.24 billion was spent remaining with TZS 352.08 billion to be utilized for implementation of the pending activities (Table 3.5).

Table 3.5: Summary of Funds Available and Utilized (amount in TZS/ million) - Transport Sector

#### 3.2.6 Water Sector

During the financial year under review, I audited seven projects financed by the World Bank, AfDB, UNDP, KFW Germany and DFID. My review showed that KWF Germany and DFID mainly finance WSDP (the major project in the sector) and the World Bank, AfDB and UNDP finance the other six projects.

In view of that, I noted that MoWI transferred funds to 183 LGAs, MoHCDGEC and President's Office-Regional Administration and Local Government (PO-RALG) for the implementation of WSDP activities while the other projects received funds directly from their Financiers.

During the financial year, TZS 313.46 billion was available, TZS 244.72 billion was spent leaving TZS 68.74 billion for the implementation of the outstanding activities, **Table 3.6.** 

Table 3.6: Summary of Funds Available and Utilized (amount in TZS/ million) - Water Sector

\_

<sup>&</sup>lt;sup>8</sup> During the financial year, I audited the project in respect of two financial years 2017/2018 and 2018/2019, however in the table of financial performance I included only the figures of financial year 2018/2019. In the financial year, 2017/2018, TZS 12.77 billion was available and TZS 265.04 million was spent to end with TZS 12.5 billion for implementation of the outstanding activities.

### 3.2.7 Social Sector and Other Projects

The social sector and other projects cover TASAF III and the Other Projects as described hereunder;

#### **Social Sector**

The activities of TASAF III are mainly financed by grants from the Government of Tanzania, the International Development Agency (IDA), the OPEC fund for International Development (OFID), UN Agencies, USAID, DFID, SIDA, and Bill and Melinda Gates Foundation (BMGF). TASAF III received a total of TZS 193.67 billion with opening balance of TZS 29.95 billion, out of which TZS 214.23 billion was utilized, remaining with TZS 9.39 billion which was utilized for activities at TASAF headquarters. However, out of the amount utilized TZS 178.32 was transferred to 188 PAAs for execution of TASAF activities countrywide.

### **Other Projects**

Other Projects receive their financing from World Bank, AfDB, UNDP, UNICEF and other Development Partners. During the year under review, the projects received funds amounting to TZS 139.18 billion and spent TZS 60.79 billion remaining with TZS 78.39 billion for implementation of the pending activities (Table 3.7).

Table 3.7: Summary of Funds Available and Utilized (amount in TZS/ million) - Other projects

### 3.3 Audit Opinions Issued

I am obliged to give an assurance to stakeholders of the respective development projects on whether the financial statements of the projects present fairly in all material respects, the financial position of the development projects as at 30 June 2019, and its financial performance, cash flows and other financial accounts prepared in order to comply with the statutory requirements.

Auditor's opinion is considered an essential tool when reporting financial information to users. For the public sector, the opinion informs the users of the financial statements on whether the financial statements of development projects have been prepared in conformity with the International Public Sector Accounting Standards (IPSAS); and in the manner required by Section 25(4) of the Public Finance Act, 2001 (revised 2004). In addition, the conformity should adhere to the requirements of Order 11-14 of the Local Government Financial Memorandum of 2009 as well as MoU's between the Government and the Development Partners.

According to audits on the development projects, I give three types of assurance on the following matters, namely; the financial statements, internal control and compliance. In the financial year 2018/2019, I issued a total of 468 opinions as follows; 455 opinions on the financial statements, and 13<sup>9</sup> opinions on internal controls and compliance with laws and regulations that relate to projects financed by UNDP, UNICEF and MIVARF.

In addition, this financial year, I did not report any significant deficiency on the 13 opinions issued for internal controls and compliance. The opinions relating to financial statements are discussed in the following paragraphs.

### 3.3.1 Audit Opinions Issued on the Financial Statements

In the financial year 2018/2019, I concluded the audit of 455 development projects and issued three types of opinions; 441 unqualified, 13 qualified, and one adverse as summarized in Table 3.8.

Table 3.8: Summary of Audit Opinions Issued

| Sector                  |             | Opinion Issued |         |            |       |  |  |
|-------------------------|-------------|----------------|---------|------------|-------|--|--|
|                         | Unqualified | Qualified      | Adverse | Disclaimer | Total |  |  |
| Energy and Mining       | 20          | -              | -       | -          | 20    |  |  |
| Water                   | 183         | 5              | 1       | -          | 189   |  |  |
| Transport               | 10          | -              | -       | -          | 10    |  |  |
| Health                  | 187         | 8              | -       | -          | 195   |  |  |

## 3.3.2 Trend of Audit Opinions Issued

The audit opinions issued for the past five years show a favourable trend with regard to the development projects as shown in **Table 3.9** and **Figure 3.1**.

 $<sup>^{9}</sup>$  12 opinions on internal controls (global fund, UNDP, and UNICEF) and 1 opinions on compliance from MIVARF

However, since the qualifications emanated from inadequate supported expenditure, there is an opportunity for the entities to improve the preparation of financial statements and record keeping of accounting documents. I therefore encourage Accounting Officers to escalate trainings of staff on record keeping and preparation of the financial statements.

Table 3.9: Trend of Audit Opinions Issued

| Financial<br>year | Opinion Issued                |    |                       |   |      |      | Total |

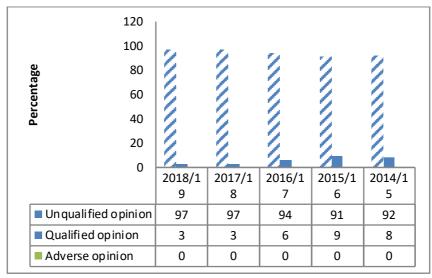

Figure 3.1: Trend of Audit Opinions

## **Unqualified Opinions**

Unqualified opinion is expressed when the auditor concludes that the financial statements of an audited entity give a true and fair view or are presented fairly in

all material respects in accordance with the applicable financial reporting framework. **Annex I** shows 441 unqualified opinions equivalent to 97 percent of total opinions issued to project implementers that had remained the same compared to financial year 2017/2018.

### **Qualified Opinion**

A qualified opinion is issued when Misstatements individually or taken together, are material, but not pervasive, to the financial statements.

During the year under review, a total of 13 qualified opinions equivalent to three per cent of total opinions were issued to implementers of HBF (eight opinions) and WSDP (five opinions). Basing on these results, HBF accounts had a significant share of the total qualified opinions (62 per cent), followed by WSDP that had 38 percent of qualified opinion. Qualified financial statements were attributed to unsupported expenditure. The basis of qualification is provided in the respective individual audit report.

It is my opinion that the unsupported expenditure signifies lapses in expenditure control and record keeping systems for the projects in question such that it raises the risks of the project monies to be used for unintended purposes or activities.

## Adverse Opinion

The adverse opinion is expressed when the effect of disagreement is so material and pervasive to the financial statements such that the auditor concludes that qualification of the report is not adequate to disclose the misleading or incomplete nature of the financial statements. Briefly, the misstatements are material

individually or in aggregate and that, they are pervasive to the financial statements.

During the year under review, I issued one adverse opinion to Handeni DC related to WSDP. The basis for qualification is provided in the respective individual audit report.

### 3.4 Findings on Financial Management Controls

In this part, I am presenting the analysis of key audit findings relating to financial management and its controls as observed in 455 individual audits conducted in 90 projects as follows:

# 3.4.1 Payments not Supported by Electronic Fiscal Device (EFD) Receipts TZS 6.51 billion

I observed that 58 Project Implementers made payments amounting to TZS 6,509,405,047.03 with respect to the procurement of goods and services without demanding EFD receipts. This is contrary to the requirements of Regulation 28 (i) of Income Tax (Electronic Fiscal Devices) Regulations, 2012.

The failure to demand the EFD receipts not only increases the risks of tax evasion, but also undermines Government efforts to increase tax collection (Annex II).

## 3.4.2 Withholding Tax not Remitted to TRA TZS 3.86 billion

My review noted that 39 Project Implementers did not remit to TRA withholding taxes amounting to TZS 3,864,036,126.64. This is contrary to Section 83(1) (b) of the Income Tax Act, 2004 (Revised 2008), which directs deduction of withholding tax from suppliers of goods, services, and effecting remittance to TRA seven days after the end of each month. As such, Government

missed its revenue from the uncollected taxes (Annex III & IV).

### 3.4.3 Outstanding Imprest TZS 1.82 billion

I observed that 11 Project Implementers had an outstanding imprest amounting to TZS 1,842,784,598.73 that has not been accounted for by the imprest holders within the prescribed number of days after the completion of the pertinent activities. The lack of accountability on the issued imprest within the prescribed time, contravenes the requirements of Order 40 (3) of the Local Government Financial Memorandum 2009 as well as Regulation 103(1) of the Public Finance Regulations 2001 (revised 2004).

In view of the above, I am concerned that the untimely accountability of the imprest issued may raise the risk that the authentication of occurrence of intended activities may not be made and the stakeholders may doubt on whether the intended activities were necessary (Annex V).

## 3.4.4 Missing Payment Vouchers TZS 824.16 million

The review of expenditure management revealed that nine Project Implementers had missing payment vouchers amounting to TZS 824,159,021.91. Absence of payment vouchers from their respective batches limited my audit scope on concluding the authenticity of the expenditure incurred. It also contravened Order 34 (1) of the Local Government Financial Memorandum 2009 and Regulation 43 of Public Audit Regulations 2009 (Annex VI).

## 3.4.5 Inadequately Supported Payments TZS 3.11 billion

During the year under review, I noted that expenditure amounting to TZS 3,105,033,861.12 from 88 project implementers were inadequately supported with

documents such as acknowledgement receipts and invoices. The anomaly observed contravened Order 8 (2) (c) of the Local Government Financial Memorandum 2009 and Regulation 95 (4) of Public Finance Regulation 2001 (revised 2004), (Annex VII).

## 3.4.6 Unpaid Compensation to Project Affected People (PAP) TZS 5.82 billion

The review of project management revealed non-payment of compensation amounting to TZS 5,815,781,142 to Projects Affected People (PAP) with regard to two projects, namely; Dar es Salaam Metropolitan Development Project and Transport Sector Support Program (TSSP) (Annex VIII).

# 3.4.7 Unspent Program Funds Not Refunded to SIDA TZS 2.49 billion

I noted that unspent funds relating to unimplemented activities amounting to TZS 2,486,096,085.98 from Literacy and Numeracy Support for Tanzania (LANES) account were not returned to Swedish International Development Agency (SIDA). This is contrary to Article 16 (Repayment) of the Financing Agreement that requires unspent balances to be refunded to SIDA within 60 days after signing of program's audited financial statements.

# 3.4.8 Unspent Balance Not Transferred to the Holding Account TZS 1.63 billion

I observed that TZS 1,632,113,281.30<sup>10</sup> being unspent balances with regard to Health Basket Fund (HBF) have not been transferred to the Holding Account for three financial years due to delays in submitting transfer request to the Ministry of Finance and Planning. The transfer request was supposed to be submitted 15 days

29

<sup>&</sup>lt;sup>10</sup> Remained funds were TZS 1,410,906,391.12 (2016/17), TZS 134,429,235.54 (2017/18), and TZS 86,777,654.65 (2018/19)

before the end of the financial year as per the requirement of Section 29 of budget Act, 2015 and its Regulation, 2015.

The untimely transfer of the unspent funds to the Holding Account may disturb the smooth flow of funds earmarked for the implementation of planned project activities.

# 3.4.9 Payment Made to Unallowable Activities by CCHP Guideline TZS 201.32 million

I found that a total of TZS 201,320,075 were spent by 22 implementers to finance health related activities which were not allowed under Para 3.5 (j) of the Council Comprehensive Health Plan (CCHP) guideline 2011 (Annex IX).

# 3.4.10 Expenditure Incurred Out of the Approved Budget TZS 81.4 million

The review of budget management revealed that ten Project Implementers spent a total of TZS 81,398,800 to finance activities that were not in the approved budget.

It is my view that, using budgeted funds to finance unintended activities may cause non-achievement of the objectives of the pertinent projects. In addition, it contravenes Regulation 46 (3) of Public Finance Regulations 2001 (revised 2004), (Annex X).

# 3.4.11 Non-involvement of TEMESA for Repair and Maintenance of Motor Vehicles TZS 128.57 million

During the year under review, contrary to Regulations 137 (1) (a) and (2) (d) of the Public Procurement Regulations 2013, I noted that 13 project implementers, made payments amounting to TZS 128,569,648.65 with respect to the repairs and Maintenance of motor vehicles at the private garages without the involvement of TEMESA. In

addition, I observed the lack of inspection of motor vehicles by TEMESA prior and after the service provision (Annex XI).

# 3.4.12 Insufficient Release of Funds to Development Projects TZS 164.23 billion

During the year under review, I observed instances where Project Implementers had unimplemented activities at the year-end due to insufficient release of funds in comparison with the approved budget.

Further analysis revealed that the Treasury and Development Partners released insufficient funds to 158 project implementers such that TZS 164,227,953,050.99 were under released in the current financial year.

However, I observed that for some projects the under release was caused by the delays and incomplete submission of project accountability reports which inhibited credit holding Development Partners to release monies as per agreements (Annex XII).

## 3.4.13 Ineligible Expenditure TZS 2.9 billion

During the year under review, I found that payments amounting to TZS 2,898,350,121.5 with regard to 20 Project Implementers were ineligible<sup>11</sup> due to non-compliance with the project/ program agreements (Annex XIII).

# 3.4.14 Exempted Projects paid VAT amounting to TZS 4.35 billion

I observed that during the execution of project activities, 17 exempted projects paid VAT amounting to TZS

\_

<sup>&</sup>lt;sup>11</sup> These relate to unallowable activities.

4,347,531,003.62 contrary to the requirements of the project/program agreements related to Value Added Tax (VAT) refunds (Annex XIV).

## 3.4.15 Borrowed Projects Fund not Refunded TZS 972.82 million

I found that the Accounting Officers of seven projects borrowed project funds amounting to TZS 972,822,256.31 in order to finance recurrent expenditures. These borrowed monies were not refunded to the respective projects.

I am of the view that non-refunding of the borrowed project funds may affect effective implementation of planned project activities (Annex XV).

# 3.4.16 Non-contribution of Government Share in the Project Financing TZS 8.45 billion

The project agreements signed between the Government and Development Partners require the Government to have shares in project financing.

However, I noted two projects, in which the Government did not contribute fully her share in the project financing such that out of TZS 11,782,602,972.9, the Government contributed only TZS 3,335,383,989.56 (equivalent to 28 percent) leaving uncontributed balance of TZS 8,447,218,983.34.

I am of the view that, the non-contribution of Government share in project financing may inhibit effective implementation of projects activities and therefore, non-realisation of projects objectives (Annex XVI).

# 3.4.17 Long Outstanding Unspent Project Balances in Holdings Accounts USD 25.16 million

My review of holdings accounts at Treasury noted that there are unspent balances amounting to USD 25,161,526.18 with respect to 12 projects. Most of the projects were closed some years back to the extent that the balances had been outstanding for a period up to seven years without being utilized (Annex XVII).

It is my view that, since the fund has been lying idle for a long period in the holding accounts there is opportunity to reallocate to other projects.

#### CHAPTER FOUR

#### PHYSICAL PERFORMANCE OF PROJECTS

### 4.1 Introduction

Among the critical point in project management practices is to ensure the projects implemented timely, within agreed budget and put in use as planned. This chapter provides details of the analysis of findings relating to project implementations presented in sector wise. The chapter shows the status of the physical performance of the projects noted with anomalies and the causes for such anomalies.

## 4.2 Affected Projects Performance Due to Unpaid Contractors

### 4.2.1 Transport Sector

Unpaid contractors claims of TZS 1.03 trillion (inclusive of penalties TZS 224.03 billion and compensations TZS 13.02 billion)

My review of construction projects relating to roads and airports carried out by TANROADS revealed significant overdue claims to contractors and consultants amounting to TZS 1,031,136,423,627.27 as at November 2019 due to late payment of Interim Payment Certificates (IPCs). The total outstanding claim comprised of principal amount TZS 794,091,175,546.39, interest charges TZS 224,025,668,186.65 (current year TZS 166,930,716,964 plus prior year TZS 57,094,951,223), and compensations amounting to TZS 13,019,579,894.23 from project affected people (Annex XVIII).

I noted that the outstanding claims was caused by the under release of funds by the Ministry of Finance and

Planning that eventually inhibited TANROADS to pay the contractors on time. The payment delays consequently resulted to slow progress of works as well as escalation of projects cost. In addition, I am concerned that the untimely payment of outstanding claims of the contractors and consultants may increase the amount of debt due to interest charges which may make the pertinent projects to stall or remain uncompleted and therefore, denying citizens from enjoying the intended benefits of the projects.

### 4.2.2 Water Sector

### Delayed Payment for Executed Works TZS 8.64 billion

Contracts clauses require project implementers to pay contractors within specified periods after certification by the project managers. My review noted delays in payments to contractors amounting to TZS 8,638,680,227 for executed works relating to 43 contracts from LGA's WSDP projects. Of the total delayed amount, TZS 2,432,115,952 relates to delay of up to seven months for the IPCs from ten contracts, and TZS 6,206,564,276 relates to delay of up to 20 months for the IPCs from 33 contracts (Annex XIX).

It is my view that delay in paying contractors for the executed works, not only increases the cost to the government due to accrued interest from penalties on the number of days delayed but also may affect the performance of the ongoing projects.

#### 4.3 **Delay in Commencement of Projects**

### 4.3.1 Transport Sector

During the year under review, I noted a delay of four regarding the commencement construction of Kasumulu/Songwe One Stop Border Post (OSBP) in Mbeya under Southern Africa Trade and Transport Facilitation Project (SATTFP). The contract, which amounts to TZS 26,426,131,304 billion, has contract number of TRD/HO/1088/2018/19.

While the delay is attributed to late payment of compensation to the Project Affected People (PAP), I am of the view that such delays inhibit the community from timely enjoyment of the intended benefits of the project.

#### 4.4 **Partially Implemented Projects**

## 4.4.1 Energy and Mining Sector

## Non- Conclusion of Pending Works and Open Contracts Relating to REA Projects

REA targets to achieve electrification of all 12,268 villages in Tanzania Mainland through implementations of turnkey projects launched more than ten years ago<sup>13</sup>.

During the year under review, I noted 60 projects relating to turnkey projects (14 phase I and 46 phase II) and 105 other rural electrification projects that are yet to be concluded due to unresolved prevailing snags and other pending contractual obligations such as non-issuance of completion certificates, Table 4.1.

<sup>12</sup> The works commenced in October 2019 instead June 2019 <sup>13</sup> Turnkey phase I, II, and III were covered in years 2010/2012, 2013/2015, and 2018/2020 respectively

and other projects occurred on demand basis.

My site visit conducted in January 2020, observed that the project contractors left the sites for the period between one to seven years without reaching any consensus with REA and TANESCO on the pending snags. This inhibited electrification of some households.

Further, there is a risk for some of electrified villages to have inadequate number of connected households under turnkey phase I and II, which could possibly be used as a lesson learnt for the ongoing turnkey phase III round one projects.

While acknowledging the efforts made by REA, it is my view that REA must devise a comprehensive plan to solve the pending snags as well as seek the conclusion on the pending contractual obligation issues noted.

Table 4.1: Pending Works from Turnkey Phase I, II, and Other Rural Electrification Projects

| Financial<br>year | Project phase                        | No. of projects completed but are yet to receive completion certificates | No. of projects in progress | Total No.<br>of projects |
|-------------------|--------------------------------------|--|-----------------------------|--------------------------|
| 2010/11           | Turnkey phase I                      | 6  | -                           | 6                        |
| 2011/12           | Turnkey phase I                      | 2  | -                           | 2                        |
| 2012/13           | Turnkey phase II                     | 6  | -                           | 6                        |
| 2013/14           | Turnkey phase II                     | 4  | 31                          | 35                       |
| 2014/15           | Turnkey phase II                     | 9  | 2                           | 11                       |
| Sub total         |                                      | 27   | 33                          | 60                       |
|                   |                                      |  |                             |                          |
| 2008/09           | Other rural electrification projects | 2  | -                           | 2                        |
| 2009/10           | -do-                                 | 5  | -                           | 5                        |
| 2010/11           | -do-                                 | 6  | -                           | 6                        |
| 2011/12           | -do-                                 | 6  | -                           | 6                        |
| 2012/13           | -do-                                 | 13   | 2                           | 15                       |
| 2013/14           | -do-                                 | 6  | 4                           | 10                       |
| 2014/15           | -do-                                 | 8  | 34                          | 42                       |
| 2015/16           | -do-                                 | 3  | 9                           | 12                       |
| 2016/17           | -do-                                 | 4  | 3                           | 7                        |
| Sub total         |                                      | 53   | 52                          | 105                      |
| Grand tota        | <u> </u>                             | 80   | 85                          | 165                      |

Source: Management letter and financial statement of 30 June 2019

### 4.5 Projects Not In Use

### 4.5.1 Water Sector

## Non-operating Water Projects TZS 3.11 billion

I noted that, at the time of audit December 2019, seven water projects valued at TZS 3,113,245,370.50 in Singida Municipal Council were completed in June 2017 but were not operating for a period of more than 30 months due to the destruction of water infrastructure and the lack of water supply from the source (Table 4.2).

I further, observed that 17 Project Implementers have 3,576 water points, which are not functioning because of irregular services or maintenance (Annex XX).

I am of the view that the non-functioning of water points may result to unsatisfactory supply of clean and safe water to the community in general.

Table 4.2: Water Projects not in Operation

| Name of Project                | Name of villages served by Project | Contract sum (TZS) |
|--------------------------------|------------------------------------|--------------------|
| Unyianga Water supply scheme   | Unyianga                           | 498,154,668.00     |
| Mtamaa-A Water supply scheme   | Mtamaa-A                           | 526,371,383.00     |
| Mtamaa-B Water supply scheme   | Mtamaa-B                           | 729,419,534.00     |
| Mwankoko-B Water supply scheme | Mwankoko-B                         | 656,039,589.50     |
| Uhamaka Water supply scheme    | Uhamaka                            | 787,227,549.00     |
| Manga Water supply scheme      | Manga                              | 648,539,533.00     |
| Mtipa Water supply scheme      | Mtipa                              | 552,875,331.00     |
| Total                          | 3,113,245,370.50                   |                    |

Source: Management letters of financial year 30 June 2019

## 4.5.2 Agriculture, Water and Social Sector

## Completed Projects Not in Use TZS 2.79 billion

In the agriculture, water and social sector, I noted ten LGAs implementing projects worth TZS 2,790,740,669.62 that were not put in use. These include three LGAs implementing MIVARF projects worth TZS 1,472,177,950

in agriculture sector, five LGAs implementing TASAF projects worth TZS 636,579,815 in social sector and two LGAs implementing WSDP projects worth TZS 681,982,904 in water sector (Annex XXI).

It is my view that, the completed projects not put in use may signify that the expected value for money from respective projects has not been achieved.

### 4.6 Delayed Completion of Projects

#### 4.6.1 Water Sector

### **Delayed Completion of Water Projects**

During the year under review, I noted that 79 contracts relating to water projects implemented by 33 Project Implementers valued at TZS 61,244,676,104 were not yet completed. My analysis shows that the delay ranges for period of one to 73 months; attributed to inadequate supervision, late release of funds, as well as inadequate community participation in the development activities (Annex XXII).

Further, my site visits on other six projects amounting to TZS 123,974,363,254.76 between September and December 2019 revealed that they are yet to be completed with a delay of up to 16 months; these delays were due to inadequate supervision (Annex XXIII).

I am of the view that the delays observed not only expose projects to the risk of cost overruns but also deny beneficiaries the enjoyment of the intended benefits.

#### **CHAPTER FIVE**

### PROCUREMENT MANAGEMENT AND GOVERNANCE

#### 5.1 Introduction

This chapter gives details of the analysis<sup>14</sup> conducted on the findings relating to procurement management and governance. The chapter will cover aspect of the anomalies found regarding procurement management as well as administrative controls relating to project management.

### 5.2 Procurement and Contract Management

### 5.2.1 Lack of Competitive Bidding Process TZS 1.33 billion

During the year under review, I noted that 28 Project Implementers procured goods and services worth TZS 1,329,456,015 from service providers without inviting competitive price quotations from at least three eligible suppliers as required by Regulation 76 of the Public Procurement Regulations 2013 (amended 2016) and First Schedule of the Local Government Authorities Tender Boards Regulations 2007.

I am of the view that, since the procurements were not competitive, there is a risk that the value for money was not attained (Annex XXIV).

# 5.2.2 Procured Goods and Services Yet to be Delivered TZS 1.45 billion

I noted that 21 Project Implementers under health sector were not able to provide evidence for delivery of goods worth TZS 1,451,357,063.82. This was due to inadequate

<sup>&</sup>lt;sup>14</sup> The findings originate from analysis of management letters and Audit reports covering financial year ended 30 June 2019.

monitoring of suppliers and service providers contrary to Regulation 114 of Public Procurement Regulations 2013 (amended 2016). Delay in delivering the procured goods and services pose the risk of non-delivery of the same or deliver items, which are different from those ordered. (Annex XXV).

## 5.2.3 Purchased Items Not Recorded in the Stores Ledgers TZS 463.83 million

Store items worth TZS 463,826,899 purchased by 35 Project Implementers were not recorded in stores which confine ledgers, the tracking items accountability Unrecorded and movement. stores risk of misallocation increase а their and misappropriation (Annex XXVI).

# 5.2.4 Procurement of Medical Supplies without Notice of Stock Out from MSD TZS 366.08 million

I noted that 26 LGAs procured medical items worth TZS 366,078,953 from private suppliers without Medical Stores Department (MSD) approval contrary to Regulation 140 of the Public Procurement Regulation 2013 (Annex XXVII).

# 5.2.5 Goods Received Prior Certification of Inspection Committees TZS 978.18 million

I noted that 38 Project Implementers received the procured goods worth TZS 978,179,796 and put them in use without certification by the Inspection and Acceptance Committee. This is contrary to Order 58(1) (2) of Local Government Financial Memorandum 2009 and Regulation 245 of Public Procurement Regulations 2013. Receiving goods without inspection increases a risk of purchasing defects or substandard goods (Annex XXVIII).

# 5.2.6 Procurements Made without Tender Boards Approval TZS 411.49 million

I reviewed purchases of goods and services from 18 LGAs and noted that purchases amounting to TZS 411,485,130 were made from various suppliers without approval of the Tender Boards contrary to Regulation 57 (3)(a) of the Public Procurement Regulations 2013 (amended 2016), Annex XXIX.

## 5.2.7 Procurement Made from Unapproved Suppliers TZS 149.51 million

Procurements amounting to TZS 149,505,182 from 16 LGAs were made from unapproved suppliers contrary to Regulation 131 (4) (b) of Public Procurement Regulations 2013 (Amended 2016). Dealing with unapproved suppliers is prone to a risk of procuring defects or substandard goods that may not meet the pre-determined specifications (Annex XXX).

# 5.2.8 Contracts Executed Without Valid Performance Securities

My review noted that 41 construction contracts with value of TZS 37,775,123,940 implemented by 17 Project Implementers without valid performance securities contrary to Regulation 29 (5) of Public Procurement Regulations 2013 (Amended 2016) and contracts clauses that require tenderer to submit additional performance security to cover effected amendment of the contract (Annex XXXI).

In the absence of valid performance securities, respective Project Implementers were exposed to risks of losing resources for the on-going projects in case the contractor(s) default or failure to execute the contracted works fully.

## 5.2.9 Projects Worth TZS 27.19 billion Implemented Without Insurance Cover

Clause 16.1 of general conditions of contract, provided in the Standard Tendering Document (Procurement of Medium and Large Works) of December 2018 requires contractor to cover loss, damage, and injury or death associated with the works from the commencement date to the end of the defects liability period.

I noted five LGAs implemented 16 projects worth TZS 27,187,086,948 without insurance covers contrary to the aforementioned clause. I am of the view that respective LGAs are at risk of not being compensated in case of underperformance of works, loss, damage, and death (Annex XXXII).

#### 5.3 Governance and Administrative Controls

# 5.3.1 Delays to Take Legal Action on 384 Extractive Companies for Non-compliance with the Act

Section 15(1)(2)(3) and 23(b) of Tanzania Extractive Industries (Transparency and Accountability) Act, 2015 requires companies to submit to the Tanzania Extractive Committee Industries annual reports containing information on local content and corporate social responsibility as well as capital expenditures at every stage of investment. A person is required to furnish information under this section and refuses or fails to comply with such requirement without reasonable causes commits an offence; punishable by the law, in case of body corporate, to a fine of not less than one hundred and fifty million shillings.

Contrary to the requirement, my review noted that 384 extractive companies are yet to submit to the Tanzania Extractive Industries Committee annual reports

containing information on local content and corporate social responsibility as well as capital expenditures at every stage of investment. However, as I conclude my audit in March 2020 TEITI is yet to take appropriate measures on the defaulting 384 companies as per Section 23(b) of Tanzania Extractive Industries (Transparency and Accountability) Act, 2015.

I understand the efforts made by TEITI management to enforce 16 out of 400 extractive companies to comply with the Act. However, I insist that TEITI extend the efforts on the remaining 384 companies for their compliance on transparency and accountability in extractive industry.

# 5.3.2 Disbursement of Loans without a List of Pre Approved Potential Borrowers TZS 16 billion

Section 6.3.2 (ii) of the Housing Microfinance Fund (HMFF) Operational Manual requires the participating Microfinance Institutions (MFI) to borrow funds based on pipeline of loan applications. At any point, the HMFF should not disburse funds until MFI submits the list of pre-approved potential borrowers with amount and purpose of each loan.

Contrary to the requirement, my review of HMFF loans noted that three loans amounting to TZS 16,000,000,000 were disbursed to MFI without submitting a list of preapproved potential borrowers as evidence of approval of pipeline for the loans applications.

I am of the view that, failure to submit the list of preapproved potential borrowers denies the Central Bank an opportunity to assess whether the loans will be lent to intended beneficiaries and for the intended purposes.

# 5.3.3 Non Performing of Environmental Impact Assessment (EIA) for 15 Projects Worth TZS 17.32 billion

Regulation 241(3) of the Public Procurement Regulations 2013 requires a procuring entity to assess the impact on the environment of any works at the planning stage of the project and in any case, before procurement proceedings are commenced. In addition, Section 81(2) of Environmental Management Act (EMA), 2004 requires the environmental impact assessment study to be carried out before commencement or financing of a project.

My review noted that 15 projects worth TZS 17,320,938,633.56 implemented by seven LGAs without environmental impact assessment (EIA) due to failure to include costs in their budgets (Annex XXXIII).

I am of the view that implementing projects without EIA expose Councils to risks of environmental consequences that are not conducive to the well-being of the communities and may in turn result into wasteful expenditure of Public resources.

## 5.3.4 Projects not Reviewed by Internal Audit Units

My review on functioning of the Internal Audit Units (IAU) for the implemented projects noted that IAUs of 43 LGAs did not conduct internal audit of the projects. Ineffective assessment of these projects by IAU inhibits the LGAs to have adequate monitoring and oversight mechanism for their projects.

According to the project documents, non-preparation of periodic internal audit reports is also contrary to para 8.5 of ASDP Basket Fund Financial Mechanism Document of 2006, para 6.3(b) of Comprehensive Council Health Planning Guideline of 2011 and para 8.2.2 of MoU

between the Government of Tanzania and DPs of February 2007 (Annex XXXIV).

#### CHAPTER SIX

#### CONCLUSION

### 6.1 Introduction

This chapter provides the conclusion of the findings presented in the preceding chapters. I have categorized my conclusion in four areas namely; General Conclusion, Financial Performance, Physical Implementation of Projects and, Procurement Management and Governance.

#### 6.2 General Conclusion

In order to achieve the Five Years Development Plan Phase II (FYDP II) goals, I am of the view that, Government institutions (especially the ones which are implementing the development projects), need to be proactive by having in place strategies that will facilitate growth and industrialization, foster human development and social transformation; and improve the environment for enterprise development.

My general conclusion drawn from the analysis made in this report shows a recurrence of deficiencies noted in my previous reports with regard to the management of development projects in the country. The main challenges noted, emanates from project financing, non-compliance to procurement and contract management, governance, and administrative control associated with these projects. Therefore, my view is that, it is the duty of Project Implementers to ensure that these deficiencies are addressed on a timely manner so that the Government achieves the Five Years Development Plan Phase II (FYDP II) goals.

On the other hand, I acknowledge Government initiatives in addressing various crosscutting issues aiming at

improving performance of the development projects. I am aware of the plan by the Government through Ministry of Works, Transport and Communication to establish committees in each region that will be responsible for facilitating and improving communication and coordination among implementers and stakeholders of the development projects in various sectors.

In addition, I am aware that the Government through the Ministry of Finance and Planning (MoFP), have issued the Treasury Circular number 2 of 2019 to guide MDAs and LGAs in ensuring that there is transparency in accounting project funds received from Development Partners through "direct to project funding modal".

#### Financial Performance

My conclusion in the area of financial management covers the status of the opinions issued, implementation of prior years' matters as well as issues relating to financial management.

My analysis shows that, more than 90 per cent of projects obtained unqualified opinions for five consecutive years from 2014/2015 to 2018/2019. It is my view that, this favourable trend will improve the decision making process among the users of financial statements. The credibility of Project Implementers will be high because the Stakeholders will have the trust that the funds entrusted to the Project Implementers are being used for the intended purposes.

However, with exception of the projects that use different accounting framework due to the requirements of the Development Partners that are vividly concluded in the financing agreements, I encourage the Accounting Officers to use IPSAS accrual as basis for the preparation of the

financial statements in order to comply with Government financial reporting framework (country systems).

I am concerned with the implementation of the prior years' recommendations as the rate of implementation is still below 50 per cent for four consecutive financial years i.e. 2015/2016 to 2018/2019. It is my view that, the Accounting Officers need to have strategies in place that will mitigate the risks of occurrence of the repetitive outstanding issues especially those that relate to expenditure management and non-compliance with project agreement.

In view of that, the expenditure management area should be given closer attention by the Accounting Officers as it is critical to the sustainability of development projects in the country.

For instance, I have observed that there is risk of the Government to refund the monies extended by the Development Partners, due to inadequate internal control over expenditure management and record keeping systems exercised by Project Implementers that result to unsupported, ineligible and irregular expenditure contrary to the requirements of the agreements.

A valid case to illustrate this scenario is that, in June and July 2017, the Government through MOHCDGEC was requested to refund USD 1,371,948 (TZS 2.195 billion) to GAVI and USD 204,000 to CDC due to inadequate internal controls over expenditure. My analysis shows that, the cases of unsupported, ineligible and irregular expenditure constitute 84 per cent for GAVI (USD 1,371,948) refund and 89 percent for the CDC (USD 181,000) refund.

In addition, I have been repetitively reporting anomalies associated with the accounting for expenditure. My reports for the financial years 2014/2015, 2015/2016, 2016/2017,

2017/2018, and 2018/2019 show a total of unsupported, ineligible and irregular expenditure to be TZS 9.5 billion, TZS 10.7 billion, TZS 17.1 billion, TZS 41.1 billion, and TZS 8.87 billion respectively as shown in **Figure 6.1.** 

Figure 6.1: Trend of Anomalies in Accounting for Expenditure

In addition to the issues I stated above that can make the Government to refund monies to the Development Partners, other issues include delays or non-refund of VAT, projects funds borrowed by project implementers but not returned to respective projects and unspent funds not returned to respective project holding account.

It is my view that, all the issues I elaborated above can be avoided if the Accounting Officers will be firm in enforcing the available controls that govern the affairs of respective projects.

## Physical Implementation of Projects

My conclusion on the area of the physical implementation of the projects will dwell on the deficiencies noted about contract management and coordination across government entities. With regard to contract management, I have observed that contractors' claims are not paid on time and adequately due to funding limitation. Consequently, that affects not only timely completion of the projects but also escalates project costs due to penalties.

For instance in the construction sector, I found payments to contractors are delayed due to inadequate release of funds by MoFP and Development Partners. I specifically noted the penalty amounting to TZS 224.03 billion imposed to TANROADS due to delays in paying the contractors. It is my view that, the Accounting Officers need to avoid delays of this sort because they derail smooth implementation of the construction projects.

In addition, under the contract management, I found that Project Implementers delay the execution of project activities, and there are completed project which are not put to use. It is my view that, this anomaly is contributed by the Accounting Officers' failure in addressing the pre and post contract management issues during the stages associated with planning, implementation and monitoring the performance of projects.

For instance, with regard to rural electrification, I observed that the lack of comprehensive strategy for accomplishing outstanding works caused REA to have pending works and open contracts for a period of up to 10 years. This implies, since the projects were partially implemented, some beneficiaries have been waiting for electricity services for a period of more than ten years.

With regard to the coordination across government entities, I am concerned about the amount of USD 25.16 million being retained for a long time in the Holding Account at MoFP without being transferred to the respective Project Implementers.

It is my view that, this amount is significant and it is high time for the Government to come up with specific negotiation strategy for addressing the long outstanding balances in the Holding Accounts. The strategy should provide alternatives to respective Development Partners which can enable re-allocation of the funds to current government priorities which are in line with FYDP II. In order the strategy to be well achieved the Ministry of Finance and Planning has to initialize a follow up with respective Project Implementers to determine the root cause.

# **Procurement Management and Governance**

My conclusion on the area of procurement management and governance shows that this area need special attention from those charged with governance because of the recurrence of the issues from my previous general reports.

Issues being reported each year are such as procurement of goods and services without competitive bidding; non-delivery of procured goods and Services; purchased items not recorded in the store ledgers; and procurement of medical supplies without notice of stock out from MSD.

Other recurring issues include; goods received prior certification of inspection committees; procurements made without tender board approval; procurement made from unapproved suppliers and contracts executed without performance securities.

With regard to governance issues, I noted that TEITI has yet to take action on 384 Extractive Companies that have not submitted the required reports. With the mining sector reforms conducted by the Government that include the protection of local content and environment, I would

expect TEITI to be proactive; It is high time for TEITI to take appropriate measures in this regard.

In addition, under the governance issues, I noted that the disbursement of loans without a list of pre-approved potential borrowers of TZS 16 billion poses risk on the sustainability of the project. I am of the view that, failure to submit the list of pre-approved potential borrowers denies the Central Bank an opportunity to assess whether the loans will be disbursed to the intended beneficiaries and for the intended purposes.

#### **CHAPTER SEVEN**

#### RECOMMENDATIONS

# 7.1 Introduction

This chapter provides recommendations that address key anomalies noted in the analysis I conducted regarding to the development projects audit reports for the financial year 2018/2019.

### 7.2 Recommendations

This part provides recommendations to the Prime Minister's Office based on the conclusions made in respect of what should be done in order to address the identified weaknesses and improvement of the performance of development projects in the country.

In view of that, the general recommendations have been designed to address all anomalies that are affecting the development projects across sectors while specific recommendations have been designed to address specific issues noted in development projects under specific sector.

#### 7.3 General Recommendations

The Prime Minister's Office should ensure that the management of MDAs and LGAs are responsible for implementing the development projects by;

- Establishing the Government Project Coordination office, this will support and monitor the implementation of all development projects in the country.
- 2. Design key indicators that will be used to monitor performance of projects in critical areas including financial management and take action on Project

Implementers who perform below the minimum performance requirements.

- 3. Reviewing and identifying the problems that are inhibiting the development projects from obtaining VAT refunds and consider designing exemption procedures that will be simple, transparent and monitored effectively by MoFP.
- 4. Implementing the outstanding recommendations on a timely manner in order to avoid recurrence of similar weaknesses in future.

# 7.4 Specific Recommendations

The Prime Minister's Office should ensure that;

- REA management in collaboration with TANESCO develops a comprehensive strategy of addressing all REA contracts in the country that are pending for long time.
- 2. Ministry of Finance and Planning release funds to TANROADS so that the outstanding claims of TZS 1,030,694,260,342 are paid without further delay to avoid possibility of further penalty charges.
- 3. Ministry of Finance and Planning make follow up with respective project implementers so that project funds retained in the holding accounts for a long period are put in use.
- 4. TEITI management take appropriate measures on 384 extractive companies so that they comply with the requirement of submitting annual reports on local content, corporate social responsibility, and capital expenditures at every stage of investment.

# **ANNEXURES**

# **Annex I: Audit Opinion Issued**

# List of Project implementers issued with Unqualified Opinions

# Agriculture Sector

| S/<br>N | Name of Project   |  |  |  |  |  |  |
|---------|---|--|--|--|--|--|--|
| 1       | African Center for Excellent for Innovative Rodent Pest Management and Biosendor Technology Development (IRPM & BTD-Rat Tech) |  |  |  |  |  |  |
| 2       | Center For Research In Agriculture Advancement Teaching Excellence and Sustainability (CREATES)                               |  |  |  |  |  |  |
| 3       | Expanding Rice Production Project (ERPP)  |  |  |  |  |  |  |

11

During the financial year, I audited the project in respect of two financial years 2017/2018 and 2018/2019, however in the table of financial performance I included only the figures of financial year 2018/2019. In the financial year, 2017/2018, TZS 12.77 billion was available and TZS 265.04 billion was spent to end with TZS 12.5 billion for implementation of the outstanding activities.
